Brand Snapshot

About Formloop
Design systems made simple.

Formloop builds tools that simplify creative workflows, helping designers work faster, stay consistent, and focus on great design.

Core Idea
Design deserves better tools.

Values

- Simplicity over complexity
- Purpose-driven design
- Speed without sacrificing craft
- Creative empowerment
- Systematic clarity.

Mission
To design thoughtful tools that remove friction from the creative process and make professional design systems accessible to everyone.

Vision
A creative ecosystem where designers spend less time on repetitive setup and more time on intentional, inspired work.

Voice & Tone
Voice is calm, confident, helpful. Tone is design-led, minimal, approachable.

We sound like a designer sharing a clever trick with another designer.

Situation Example

Product Page
“Create cleaner layouts in seconds. Formloop tools help you work faster without losing precision.”

Newsletter
“We build tools that cut the busy work and make your process feel effortless.”

Social
“Small tools. Big time-savers.”

Logo Spacing Rules

Use X as the base spacing unit.

X = one quarter of the loop height

Minimum space between the loop icon and wordmark = one quarter of X

No text, graphics, UI, or other logos may enter this space

Logo Usage

Use the full logo when legibility is strong

Use the small-format logo in tighter layouts

Use the loop icon only when the full logo becomes hard to read

Use light logo variants on dark backgrounds

Use dark logo variants on light backgrounds

SPACING LOGIC

formloop

Color System

Color Usage Rules

Use primary colors for the strongest brand moments.

Use secondary colors to support structure and depth.

Use accent colors sparingly for highlights, actions, and key visual moments.

Use light backgrounds for clean, editorial compositions.

Use dark backgrounds for higher contrast and stronger visual focus.

Always maintain clear contrast between text, logo, CTA, and background.

Do not use accent colors as full-page backgrounds unless contrast and hierarchy remain strong.

PRIMARY COLORS

THESE COLORS SHOULD CARRY THE STRONGEST BRAND PRESENCE.

Cobalt
HEX: #003aaa
RGB: 0, 58, 170
CMYK: 100, 66, 0, 33

White Smoke
HEX: #f5f8fc
RGB: 245, 248, 252
CMYK: 3, 2, 0, 1

SECONDARY COLORS

THESE COLORS SUPPORT THE PRIMARY PALETTE AND HELP CREATE DEPTH, VARIATION, AND BALANCE.

Sky Blue
HEX: #64c0ff
RGB: 100, 192, 255
CMYK: 61, 25, 0, 0

Marine
HEX: #002366
RGB: 0, 35, 102
CMYK: 100, 66, 0, 60

Midnight Blue
HEX: #001133
RGB: 0, 17, 51
CMYK: 100, 67, 0, 80

ACCENT COLORS

ACCENT COLORS SHOULD BE USED SPARINGLY TO HIGHLIGHT ACTIONS, COMPATIBILITY, OR FEATURED VISUAL MOMENTS.

Electric Blue
HEX: #0057ff
RGB: 0, 87, 255
CMYK: 100, 66, 0, 0

Sea Green
HEX: #66ff86
RGB: 102, 255, 134
CMYK: 60, 0, 47, 0

Lemon
HEX: #ffff53
RGB: 255, 255, 83
CMYK: 0, 0, 67, 0

BACKGROUND COLORS

THESE COLORS SHOULD BE USED FOR LARGE FIELDS AND LAYOUT STRUCTURE.

Pale Gray
HEX: #e6ecf4
RGB: 230, 236, 244
CMYK: 6, 3, 0, 4

Obsidian
HEX: #070c14
RGB: 7, 12, 20
CMYK: 65, 40, 0, 92

Pine
HEX: #14331b
RGB: 20, 51, 27
CMYK: 61, 0, 47, 80

TEXT COLORS

TEXT SHOULD ALWAYS MAINTAIN STRONG CONTRAST AGAINST THE BACKGROUND.

Obsidian
HEX: #070c14
RGB: 7, 12, 20
CMYK: 65, 40, 0, 92

White Smoke
HEX: #f5f8fc
RGB: 245, 248, 252
CMYK: 3, 2, 0, 1

formloop

Typography System

Type Logic

Headlines should be the strongest text element in every format.

Headlines should usually appear at approximately 3× the size of the subheadline and 4–5× the visual importance of caption text.

Subheadlines should sit directly under the headline when used.

Body text should support the message, not carry the composition.

Caption and support text should remain visually quiet.

Type Behavior Rules

Headlines should stay to 2–4 lines in most formats.

Body text should be reduced or removed before headline text in constrained layouts.

CTA text should stay short, clear, and scannable.

Caption and support text should never overpower the headline or CTA.

Text should remain left-aligned in most formats for clarity and consistency.

Avoid long text blocks in narrow banners or small digital formats.

HEADLINE STYLE

Color Palette Collector Lite for Adobe Illustrator

SUBHEADLINE STYLE

Turn artwork into a palette in one click.

BODY STYLE

To design thoughtful tools that remove friction from the creative process and make professional design systems accessible to everyone.

CAPTION OR SMALL-TYPE STYLE

COLOR PALETTE COLLECTOR SCRIPT

TYPE SYSTEM

Headline Inter-Regular Size: 100pt Leading: 112 Tracking: -40 Aligned left	HEADLINES SHOULD CARRY THE MAIN MESSAGE AND LEAD THE COMPOSITION.
Subhead Inter-Regular Size: 36pt Leading: 49 Tracking: 0 Aligned left	SUBHEADLINES SHOULD SUPPORT THE HEADLINE AND PROVIDE CONTEXT WITHOUT COMPETING WITH IT.
Body text Inter-Regular Size: 22pt Leading: 33 Tracking: 0 Aligned left	BODY TEXT SHOULD STAY CONCISE, READABLE, AND SECONDARY TO THE MAIN MESSAGE.
Caption Inter-Medium Size: 18pt Leading: 28 Tracking: 120 Aligned left	CAPTIONS AND SUPPORT TEXT SHOULD PROVIDE UTILITY, NOT VISUAL COMPETITION.

formloop

Layout Principles

General Structure

Formloop graphics should feel clear, spacious, and intentional.
The composition should guide the eye quickly and keep the core message easy to understand across all sizes.

Space

Use healthy negative space to support hierarchy and legibility.
Do not overcrowd the layout with too many competing elements.

Layout

Main content should begin on column 2 in standard horizontal formats

In smaller or narrower formats, alignment may shift to preserve hierarchy and legibility

Supporting logos and support information should sit in the footer zone whenever possible

CTA should usually appear under the headline and subheadline stack

The logo should sit above the headline in smaller formats and may sit in a protected corner zone in wider layouts

Text Behavior
Text should remain left-aligned in most formats

Core content, logo, and CTA should typically occupy 5–6 columns in standard horizontal compositions

Subheadline should sit directly under the headline when used

Support text should remain secondary and should not interrupt the headline-to-CTA flow

Hero Image Behavior

Hero imagery should usually occupy 3–4 columns in balanced formats

In narrower or more immersive formats, hero imagery may expand and become more dominant

Hero imagery should support the message, not fight it

If the composition becomes crowded, the hero image may shift into a background role

Layout Behavior in Constrained Formats

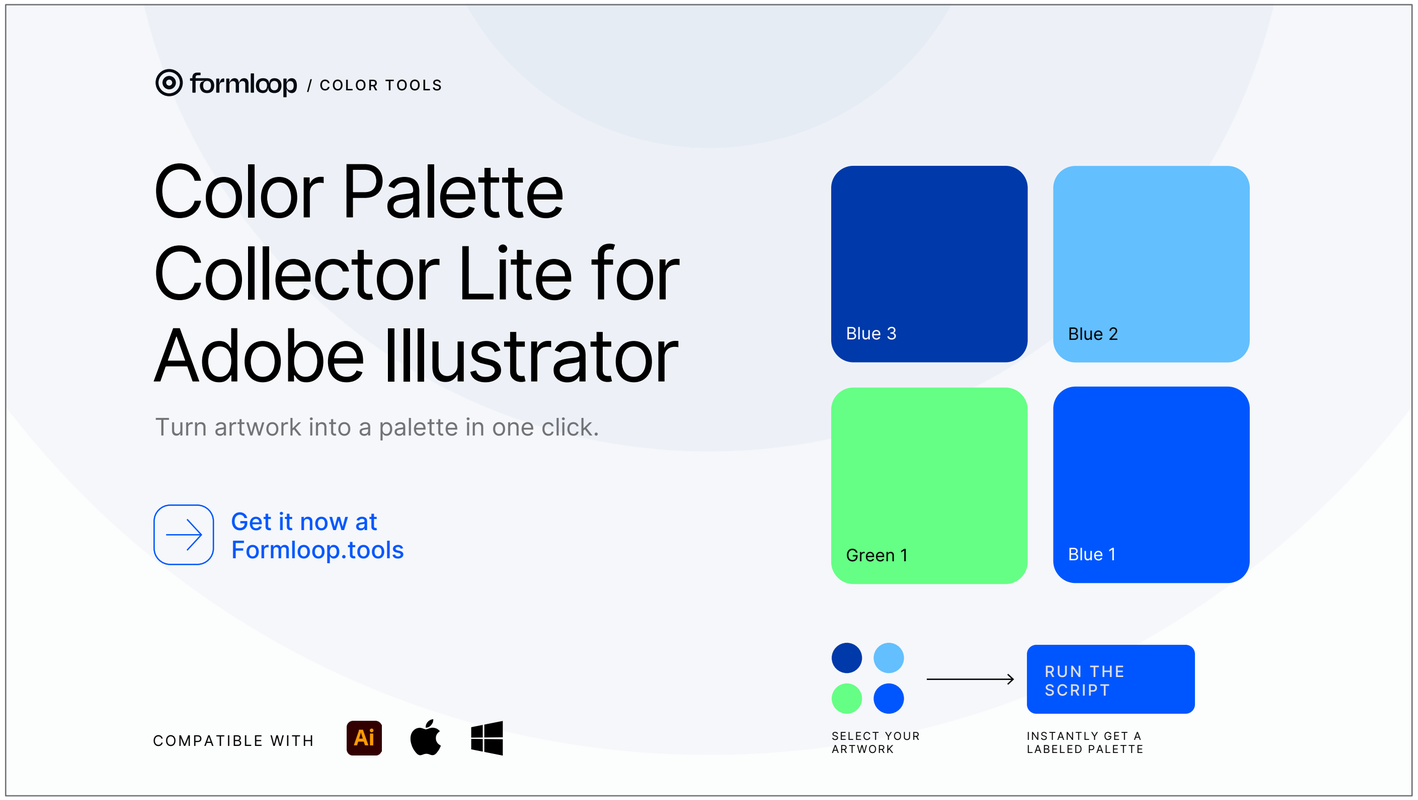
Preserve logo, headline, and core brand signal first

Reduce optional support details before critical elements

Preserve CTA when it remains legible and useful

Reduce decorative or secondary content before reducing primary message elements

GRAPHIC EXAMPLE (16:9 — 12 COLUMN, 6 ROWS GRID)



HIERARCHY

THE READING ORDER SHOULD USUALLY BE:

HEADLINE
HERO IMAGE OR PRIMARY VISUAL
CTA
SUPPORT DETAILS
SUPPORT LOGOS OR COMPATIBILITY DETAILS

IF THE FORMAT IS ESPECIALLY VISUAL, THE HERO IMAGE MAY BECOME THE FIRST FOCAL POINT. THE HEADLINE SHOULD STILL REMAIN THE PRIMARY MESSAGE ANCHOR.

formloop

Modular Grid and Safe Areas

Formloop uses a modular grid system to create consistent, flexible layouts across formats.

Base Grid

Standard wide formats use a 12-column, 6-row grid.
Square formats use a 6-column, 6-row grid.
Tall formats use a 6-column, 12-row grid.
Super-wide formats use a 12-column, 3-row grid.

Columns and rows should scale proportionally with the format size.

Margins and Gutters

Base margins begin at 54 px on a 1920 × 1080 layout.
Base gutters begin at 20 px on a 1920 × 1080 layout.

Margins and gutters should scale proportionally with the format.
In constrained formats, margins may reduce slightly to preserve hierarchy and legibility.

Zone Priority Rules

The logo zone and headline zone are protected zones.

The hero image zone is flexible and may expand or compress by format.

The CTA zone is flexible but should remain easy to find.

The footer zone should absorb secondary information first.

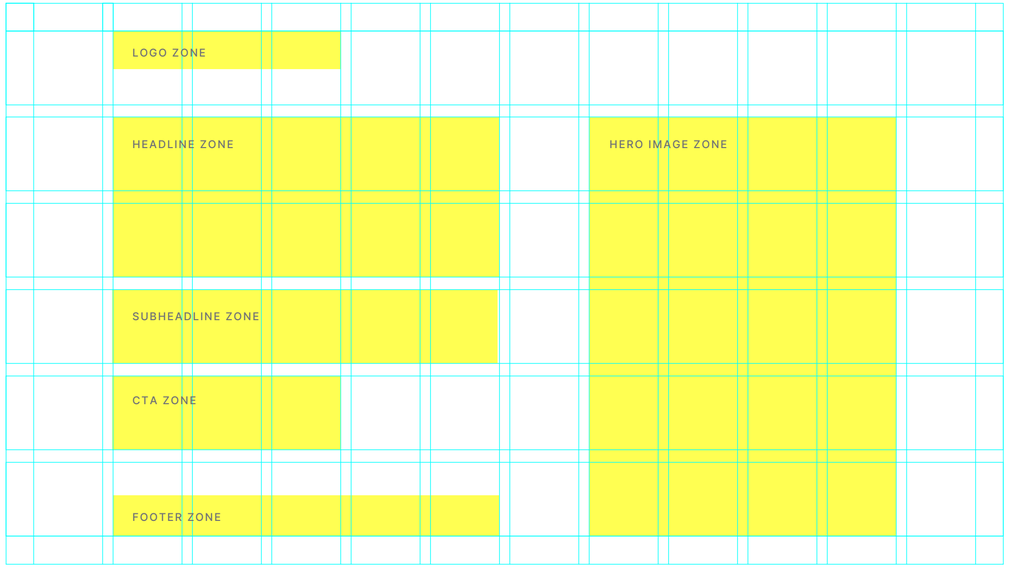
If space becomes constrained, secondary information should reduce in the footer zone before core message zones are affected.

Safe Area Rules

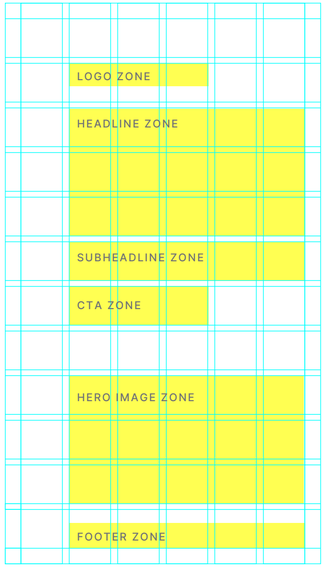
No critical brand elements should sit too close to the trim edge.
Logo, headline, and CTA should remain inside safe margins in every format.

If the format becomes constrained, reduce secondary elements before breaking the safe area for critical elements.

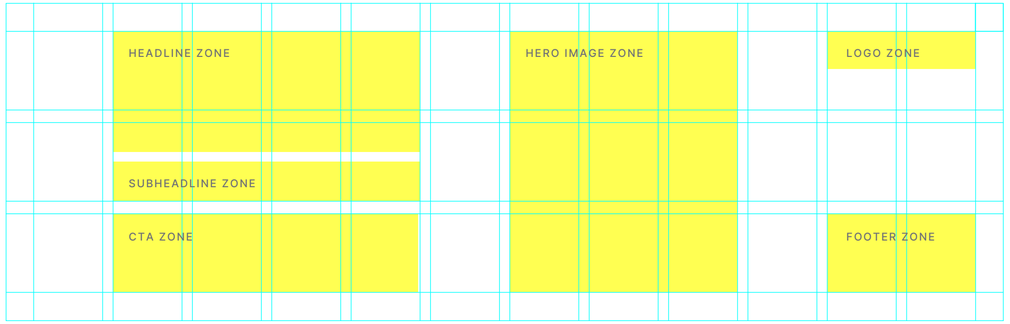
12 COLUMNS, 6 ROWS GRID (16:9)



6 COLUMNS, 12 ROWS GRID (9:16)



12 COLUMNS, 3 ROWS GRID (32:9)



6 COLUMNS, 6 ROWS GRID (1:1)

ZONE SYSTEM

EACH LAYOUT SHOULD USE NAMED ZONES TO PROTECT STRUCTURE AND CONSISTENCY.

LOGO ZONE
RESERVED FOR THE FULL LOGO OR LOOP ICON.

HEADLINE ZONE
RESERVED FOR THE MAIN HEADLINE. THIS IS A PROTECTED ZONE.

SUBHEADLINE ZONE
RESERVED FOR SUPPORTING MESSAGE OR PRODUCT DETAIL.

HERO IMAGE ZONE
RESERVED FOR THE PRIMARY IMAGE OR FOCAL VISUAL.

CTA ZONE
RESERVED FOR CALLS TO ACTION, DOWNLOAD PROMPTS, OR PRIMARY ACTION SIGNALS.

FOOTER ZONE
RESERVED FOR SUPPORT LOGOS, COMPATIBILITY ICONS, OR SECONDARY INFORMATION.

formloop

Asset Usage Rules

Asset Behavior Rules

Preserve core brand identity before support details

Use hero imagery when it strengthens the main message

Use CTA only when it remains clear and useful

Swap the full logotype for the loop icon only when the full logo becomes hard to read

If a background image reduces text clarity, reduce its contrast or remove it

Priority Order in Constrained Formats

Logo or loop icon
Headline
Core hero or primary product visual
CTA, if still legible
Campaign-critical date or platform lockup
Support logos and secondary details

Format Adaptation Rules

In square and portrait formats, preserve logo, headline, hero, and CTA unless legibility breaks

In wide banners, simplify quickly and preserve logo, headline, and CTA first

In very small formats, the full logo may collapse to the loop icon

Support logos should reduce before CTA

CTA should reduce before core brand identity

Hero imagery may shift into a background role in constrained layouts

Background Compatibility Rules

Use light logo variants on dark backgrounds

Use dark logo variants on light backgrounds

Avoid low-contrast logo and background combinations

CTA should always maintain clear contrast against the surrounding field

ASSETS MATRIX

THESE RULES DEFINE HOW EACH ASSET TYPE SHOULD BEHAVE ACROSS CAMPAIGN FORMATS.

	PURPOSE	REQUIRED	OPTIONAL	WHEN TO USE	WHEN TO CAN IT DROP
LOGOTYPE	SUPPORTS BRAND RECOGNITION	YES	NO	USE IN MOST FORMATS WHEN LEGIBILITY REMAINS STRONG	NO. IF SPACE BECOMES TOO TIGHT, COLLAPSE TO THE LOOP ICON
HERO IMG	SUPPORTS THE TITLE AND PROVIDES A FOCAL VISUAL	NO	YES	USE IN MOST CAMPAIGNS WHEN IMAGERY IMPROVES CLARITY OR IMPACT	YES, IN CONSTRAINED OR TEXT-HEAVY FORMATS
BG IMG	SUPPORTS VISUAL ATMOSPHERE AND LAYOUT DEPTH	NO	YES	USE WHEN IT IMPROVES VISUAL CLARITY WITHOUT REDUCING LEGIBILITY	YES, WHEN IT COMPETES WITH HIERARCHY OR MAKES TEXT HARDER TO READ
CTA GFX	DRIVES TRAFFIC, DOWNLOADS, OR ACTION	NO	YES	USE WHEN THE CAMPAIGN NEEDS A CLEAR ACTION	YES, WHEN SPACE IS LIMITED OR LEGIBILITY IS AFFECTED
DATE/MISC LOCKUP	COMMUNICATES DATE, TIME, OR RELEASE DETAIL	ONLY WHEN CAMPAIGN-CRITICAL	YES	USE FOR LAUNCH, EVENT, DROP, OR TIME-BASED CAMPAIGNS	YES, AFTER CORE BRAND AND MESSAGE ELEMENTS ARE PRESERVED
SUPPORT LOGOS	COMMUNICATES SOFTWARE SUPPORT, COMPATIBILITY, OR PARTNERSHIP	NO	YES	USE ONLY WHEN INSTRUCTED OR CAMPAIGN-RELEVANT	YES, REDUCE THESE FIRST IN CONSTRAINED FORMATS

formloop

Example Compositions

These examples show how the system should adapt across formats while preserving hierarchy, brand clarity, and core message.

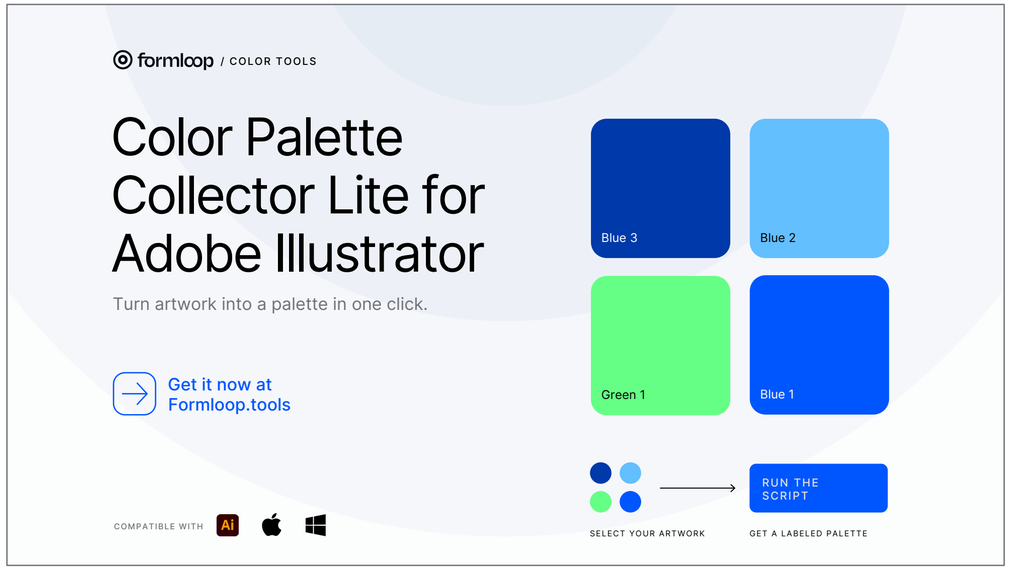
General Hierarchy Rule

Use this reading order in most formats:

Headline
Hero image or primary visual
CTA
Support details
Support logos or compatibility details

If the format is especially visual, the hero image may become the first focal point. The headline should still remain the primary message anchor.

SOCIAL HORIZONTAL

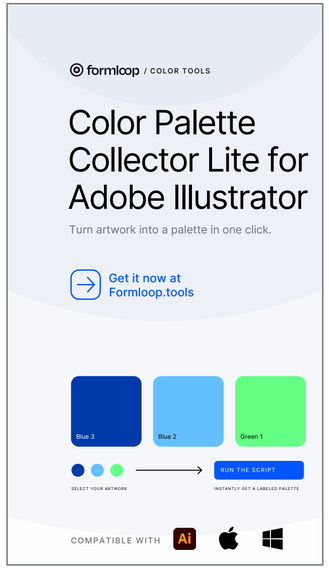


WHAT STAYS FIXED
HEADLINE, CTA, HERO EMPHASIS

WHAT ADAPTS
LOGO MAY SHIFT TO A PROTECTED CORNER ZONE

WHAT DROPS FIRST
SUPPORT LOGOS IF SPACE BECOMES TIGHT

DISCOVERY/REELS

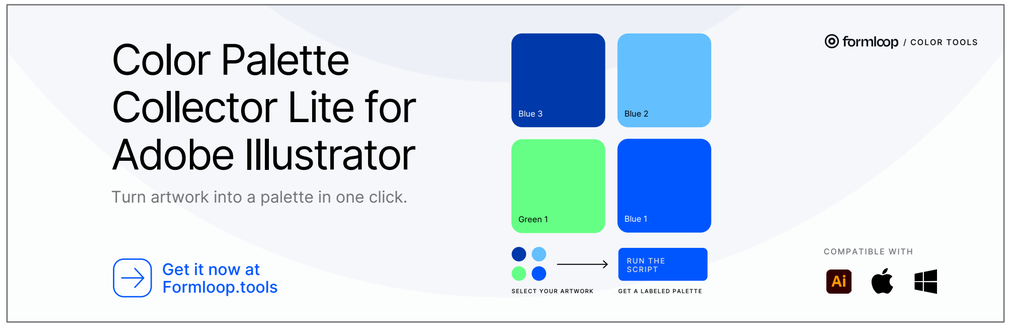


WHAT STAYS FIXED
STACKED HIERARCHY, HEADLINE, CTA

WHAT ADAPTS
HERO IMAGE BECOMES MORE DOMINANT IN VERTICAL SPACE

WHAT DROPS FIRST
SUPPORT DETAILS IN THE FOOTER ZONE

BILLBOARD/BANNER



WHAT STAYS FIXED
LOGO, HEADLINE, CTA

WHAT ADAPTS
LAYOUT SIMPLIFIES QUICKLY, HERO MAY BECOME SECONDARY

WHAT DROPS FIRST
SUPPORT LOGOS AND SECONDARY DETAILS

SOCIAL SQUARE

WHAT STAYS FIXED
LOGO, HEADLINE, HERO, CTA

WHAT ADAPTS
SUPPORT LOGOS MAY MOVE BELOW THE HERO ZONE

WHAT DROPS FIRST
FOOTER DETAILS BEFORE PRIMARY CAMPAIGN ELEMENTS
